

CLDDV 101

Time Tracking Assignment

Using the form provided, track the activity of at least 5 children for at least 60 minutes in 10 minute intervals. Create a “patchwork quilt” of the time tracking. Provide a key or legend at the bottom of the page. Write a three to four page paper answering the following questions based on your observation.

Provide the standard observational information at the beginning of your paper.

1. Based on your time tracking, determine the strengths and weaknesses of the **environment and curriculum**. Where did children want to be? What activities were less attractive and interesting to the children? What kind of adult supervision or support could be provided to enhance the children’s experience? Did you see patterns?
2. Provide a one-two paragraph summary of your experience and the things you have written about. Give your opinions and your recommendations for the program and/or for specific ways to address the needs of the children in it.
3. Staple your original time tracking tool and your patchwork quilt to your **typewritten** paper. **All papers must be typewritten, with no less than a 12 font, space and a half. Use regular printer size paper for your Quilt.**
